Keywords

- Linux 2.6.35
- GCC 4.4.5:
- FUSE Filesystem in USErspace
  - implement fully functional filesystem in a userspace program
  - piece of code that communicates with the kernel as a filesystem would
  - runs on Linux kernels 2.4.X and 2.6.X
  - libfuse - http://fuse.sourceforge.net/
- C programming language

- Determine if VFS implementation is feasible
- Data organization
- Search methods
- Start coding
